

## **Purification of proteins using Äkta Systems:**

### **Using the Unicorn software for automated purification protocols**

The unicorn software offers a huge range of options and opportunities for the automation of protein purification. The target audience for this course comprises beginners as well as semi-advanced users of Äkta Systems under Unicorn control. During the first two days the participants will learn how to write methods for specific applications and how to use the software for the analysis and visualization of their results. The last day is reserved for questions and to discuss users' specific applications.

During the course we will work with Unicorn version 5.1. For further questions or registration please send an email to [Klaus.kock@rub.de](mailto:Klaus.kock@rub.de).

Date: 01. Dec- 12. Dec

Duration: 2-3 days

Max. participants: 3

Location: Ruhr-Universität Bochum, AG Proteininteraktionen, NC 6/72
